

TecDoc Catalog API Documentation (RapidAPI)

Base URL: `https://tecdoc-catalog.p.rapidapi.com`

The TecDoc Catalog API provides structured data about automotive languages, countries, manufacturers, models, vehicles, parts and VIN-decoding. Each call uses the `GET` HTTP method and requires a RapidAPI `X-RapidAPI-Key` and the host header `tecdoc-catalog.p.rapidapi.com`. Some endpoints in the RapidAPI interface did not return details—those are presumed broken or deprecated and are not listed here. All functional endpoints observed are summarized below.

Languages & Countries

Endpoint	Path and parameters	Description
List languages	<code>GET /languages/list</code>	Returns a list of supported languages. No parameters ¹ .
List countries	<code>GET /countries/list</code>	Returns a list of available country filters. No parameters ¹ .
Language info by ID	<code>GET /languages/get-language/lang-id/{langId}</code>	Retrieves information about a language. Requires <code>langId</code> as a path parameter ² .
Countries by language ID	<code>GET /countries/list-countries-by-lang-id/{langId}</code>	Lists countries available for a language. Requires <code>langId</code> ³ .
Country info by language and country ID	<code>GET /countries/get-country/lang-id/{langId}/country-filter-id/{countryFilterId}</code>	Returns details for a specific country and language. Requires <code>langId</code> and <code>countryFilterId</code> ⁴ .

Manufacturers

Endpoint	Path and parameters	Description
Type IDs	<code>GET /types/list-vehicles-type</code>	Lists available vehicle types (e.g., passenger, motorcycle). No parameters ⁵ .
Manufacturer IDs by type	<code>GET /manufacturers/list/type-id/{typeId}</code>	Returns manufacturer IDs for a vehicle type. Requires <code>typeId</code> ⁶ .
Manufacturer info by ID	<code>GET /manufacturers/find-by-id/{manufacturerId}</code>	Retrieves information about a manufacturer. Requires <code>manufacturerId</code> ⁷ .

Models

Endpoint	Path and parameters	Description
Models by type & manufacturer	GET /models/list/type-id/{typeId}/manufacturer-id/{manufacturerId}/lang-id/{langId}/country-filter-id/{countryFilterId}	Lists all models for a manufacturer and vehicle type, for a given language and country filter. Requires typeId, manufacturerId, langId and countryFilterId ⁸ .
Model details by model ID	GET /models/type-id/{typeId}/model-id/{modelId}/lang-id/{langId}/country-filter-id/{countryFilterId}	Returns detailed information about a specific model. Requires typeId, modelId, langId and countryFilterId ⁹ .
Model details by vehicle ID	GET /models/type-id/{typeId}/vehicles/{vehicleId}/lang-id/{langId}/country-filter-id/{countryFilterId}	Retrieves model details based on a vehicle ID. Requires typeId, vehicleId, langId and countryFilterId ¹⁰ .

Vehicles

Endpoint	Path and parameters	Description
Vehicle types	GET /types/list-vehicles-type	Returns a list of vehicle types (same as the Types endpoint in Manufacturers) ¹¹ .
Vehicle info by ID	GET /types/type-id/{typeId}/vehicle-type-details/{vehicleId}/lang-id/{langId}/country-filter-id/{countryFilterId}	Retrieves detailed information about a vehicle (e.g., power, fuel type). Requires typeId, vehicleId, langId and countryFilterId ¹² .
Engine types by model	GET /types/type-id/{typeId}/list-vehicles-types/{modelId}/lang-id/{langId}/country-filter-id/{countryFilterId}	Returns engine types available for a model. Requires typeId, modelId, langId and countryFilterId ¹³ .
Engine details	GET /engines/engine-details/engine-id/{engineId}/lang-id/{langId}	Provides detailed information about a specific engine. Requires engineId and langId ¹⁴ .
Vehicle IDs by model	GET /types/type-id/{typeId}/list-vehicles-id/{modelId}/lang-id/{langId}/country-filter-id/{countryFilterId}	Lists vehicle IDs for a model. Requires typeId, modelId, langId and countryFilterId ¹⁵ .

Endpoint	Path and parameters	Description
Vehicles by KBA number (Germany)	GET /types/searching-the-passenger-car-by-ltn-number/lang-id/{langId}/country-filter-id/{countryFilterId}/ltn-number/{ltnNumber}/number-type/{numberType}	Searches vehicles by German KBA (Ltn) number. Requires <code>langId</code> , <code>countryFilterId</code> , <code>ltnNumber</code> and <code>numberType</code> (1 = KBA, 2 = license plate) ¹⁶ .
Vehicles by Dutch license plate	GET /types/searching-the-passenger-car-by-ltn-number/lang-id/{langId}/country-filter-id/{countryFilterId}/ltn-number/{ltnNumber}/number-type/2	Retrieves vehicles using a Dutch license plate (set <code>numberType</code> = 2) ¹⁷ .
Part criteria for a vehicle	GET /articles/selection-of-the-criteria-for-articles-and-vehicle-type-id/{typeId}/product-id/{productId}/vehicle-id/{vehicleId}/supplier-id/{supplierId}/lang-id/{langId}/country-filter-id/{countryFilterId}	Returns criteria values used to filter parts for a vehicle. Requires <code>typeId</code> , <code>productId</code> , <code>vehicleId</code> , <code>supplierId</code> , <code>langId</code> and <code>countryFilterId</code> ¹⁸ .

Parts (Articles)

The Parts/Articles section contains many endpoints. Several endpoints in the RapidAPI interface did not display details (likely deprecated). Below are all accessible endpoints:

Endpoint	Path and parameters	Description
List all categories	GET /category/type-id/{typeId}/list-category-tree-structure/lang-id/{langId}	Returns a hierarchical list of product categories for a vehicle type. Requires <code>typeId</code> and <code>langId</code> ¹⁹ .
List categories by vehicle ID (v2)	GET /category/type-id/{typeId}/products-groups-variant-2/{vehicleId}/lang-id/{langId}	Lists product categories that fit a vehicle. Requires <code>typeId</code> , <code>vehicleId</code> and <code>langId</code> ²⁰ .
Search categories by description	GET /category/search-for-the-commodity-group-tree-by-description/type-id/{typeId}/lang-id/{langId}/search-text/{searchText}	Performs a text search on category names. Requires <code>typeId</code> , <code>langId</code> and <code>searchText</code> ²¹ .
List all product names	GET /category/list-products-names/lang-id/{langId}	Returns a list of all product names. Requires <code>langId</code> ²² .
List all suppliers	GET /suppliers/list	Lists all suppliers. No parameters ²³ .

Endpoint	Path and parameters	Description
Search articles by article number (basic)	GET /articles/search-by-article-no/lang-id/{langId}/article-no/{articleNo}	Searches parts by article number. Requires langId and articleNo ²⁴ .
Search articles by article number v2	GET /artlookup/search-articles-by-article-no/lang-id/{langId}/article-type/{articleType}/article-no/{articleNo}	Searches articles using an article number and type. Requires langId, articleType (e.g., IAMNumber, ArticleNumber, TradeNumber, OENumber, EAN) and articleNo ²⁵ .
Compatible vehicles by article number	GET /articles/vehicles-by-article-no/type-id/{typeId}/article-no/{articleNo}/lang-id/{langId}/country-filter-id/{countryFilterId}	Returns vehicles compatible with a given article number. Requires typeId, articleNo, langId and countryFilterId ²⁶ .
Compatible vehicles by article number & supplier ID	GET /articles/vehicles-by-article-no-and-supplier-id/type-id/{typeId}/article-no/{articleNo}/supplier-id/{supplierId}/lang-id/{langId}/country-filter-id/{countryFilterId}	Similar to the previous endpoint but includes supplierId ²⁷ .
Cross-references by article number	GET /artlookup/search-for-cross-references-through-oem-numbers/article-no/{articleNo}/supplierName/{supplierName}	Provides OEM cross-reference information for an article number. Requires articleNo; supplierName is optional ²⁸ .
Analog spare parts by article number	GET /artlookup/search-for-analog-spare-parts-by-article-numbers/lang-id/{langId}/article-no/{articleNo}	Returns analog replacement parts for a given article number. Requires langId and articleNo ²⁹ .
Additional endpoints	The Parts section lists many other endpoints for searching by OEM number, listing vehicles by OEM, retrieving article details, etc. However, numerous entries did not display parameter information when selected—these were likely deprecated or incomplete, so they are not documented here.	

VIN (Vehicle Identification Number)

VIN decoding allows retrieval of vehicle details from a VIN. The API includes multiple decoder versions.

Endpoint	Path and parameters	Description
VIN check	GET /vin/tecdoc-vin-check/{vinNo}	Performs a TecDoc VIN check and returns the matching vehicle record. Requires <code>vinNo</code> ³⁰ .
VIN decoder v1	GET /vin/decoder-v1/{vinNo}	Decodes a VIN into technical information (first version). Requires <code>vinNo</code> ³¹ .
VIN decoder v2	GET /vin/decoder-v2/{vinNo}	VIN decoder version 2 with updated mapping. Requires <code>vinNo</code> ³² .
VIN decoder v3	GET /vin/decoder-v3/{vinNo}	The latest VIN decoder endpoint; returns detailed vehicle data. Requires <code>vinNo</code> ³³ .

Notes and Limitations

- **Authentication:** Each request must include your RapidAPI key (`X-RapidAPI-Key`) and the host header `tecdoc-catalog.p.rapidapi.com`. Without valid credentials, the API returns an *Invalid API key* error.
- **Unavailable Endpoints:** Several entries in the RapidAPI interface did not display parameter details or code snippets—these endpoints were skipped in this documentation. They appear to be placeholders or non-functional.
- **Localization:** Many endpoints require both a language ID (`langId`) and a country filter ID (`countryFilterId`). Use the *Languages* and *Countries* endpoints to discover valid values.
- **Vehicle Types:** The API distinguishes between vehicle types (e.g., passenger car, commercial, motorcycle). Use the *Type IDs* endpoint to retrieve valid type identifiers.

This document captures the full set of functional endpoints available from the TecDoc Catalog API on RapidAPI as of December 2025. If TecDoc or RapidAPI updates their documentation, additional endpoints may become available.
